IRP LESSON TASK 1: COLLOCATIONS

Task Overview

This lesson task is designed to evaluate/review your knowledge of collocations (words that frequently occur together in academic texts, e.g., conduct research, significant impact) while developing your academic writing skills. Accurate use of collocations improves fluency, coherence, and credibility in academic writing.

Your work will be evaluated on the accuracy and appropriateness of collocations, as well as clarity and grammatical correctness.

This is an in-class task. If you are absent, you will not be able to complete or submit the task at another time. All activities in the booklet will be compulsory.

Writing and Submission Guidelines

You may use:

- An offline monolingual English dictionary
- An offline collocations dictionary (paper or digital without internet access)

You may not:

- Use online sources or Wi-Fi
- Use AI tools or software (e.g., ChatGPT, Grammarly)
- Use your mobile phone
- Include citations

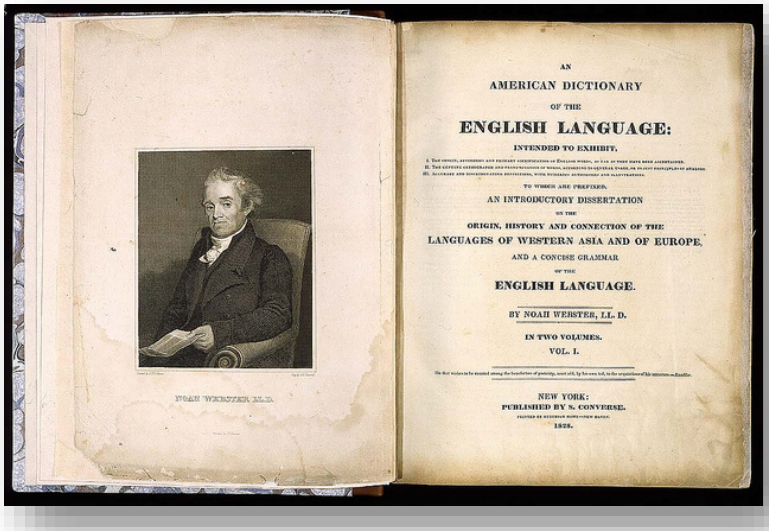
Upload your completed task to Moodle before the end of today's class.

CHOOSING THE CORRECT COLLOCATION IN CONTEXT

1. Read the text below and choose the most appropriate word in each pair to complete the collocations in bold:

Noah Webster's American Dictionary of the English Language

The **dictionary** compiled/formed by Noah Webster (1758–1843) in the years after American independence is a prime example of the shaping/making of a distinct cultural **identity** for political means. One of Webster's ambitions was to give his newly/freshly **independent nation** a language of its own. In the early/starting **stages** of its development, Webster was planning to call his project a *Dictionary of the American Language*, and he wrote of American and English as being distinct languages. (Finegan, 2006, p. 392). By the time he came to publish in 1828, however, he had settled on the less radical title of *An American Dictionary of the English Language*. Yet **a** key/grave **aim** of his was still to use the dictionary as a means of distinguishing between the English that was used in Britain and that used in America. He did this primarily through attempts to reform/repair the spelling **system** so that American English *looked* markedly/highly **different** from British English. Webster's motivations were highly/considerably **political** and based on his belief that 'a *national language* is a band of *national union*' (Webster, 1991).



Noah Webster's American Dictionary of the English Language, published in 1828.

GAP FILL – COLLOCATIONS IN A REAL-WORLD ACADEMIC CONTEXT

1. Choose the correct (or more likely) collocation in each of the following groups by giving a tick: ✓:

Example

✓

a) i) first ii) ***core*** iii) centred *functions*

b) i) *for the time owning* ii) *for the time having* iii) *for the time being*

c) at i) highest ii) grandest iii) uppermost *risk from*

d) *legal* i) exercises ii) tasking iii) activities

e) i) prime ii) major iii) prominent / *economies*

f) *potential* i) for ii) in iii) with

g) i) proficient ii) skilled iii) expert *professions*

h) i) push ii) activate iii) trigger *job losses*

i) i) raising ii) promoting iii) erecting *fears*

2. Read the article excerpt and complete the gaps using appropriate academic collocations from the previous exercise or your own knowledge. **You will be assessed on the accuracy and suitability of the collocations you choose. In each gap, give one of the letters in Exercise 1 from the page above**

AI REVOLUTION PUTS SKILLED JOBS AT HIGHEST RISK, OECD SAYS

Law and finance sectors could be among most affected, according to organisation's employment outlook.

i) ..... are on the "cusp of an AI revolution" that could **ii)** ..... in **iii)** ..... such as law, medicine and finance, according to an influential international organisation.

The Organisation for Economic Co-operation and Development (OECD) said the occupations **iv)** ..... AI-driven automation were highly-skilled jobs and represented about 27% of employment across its 38 member countries, which include the UK, Japan, Germany, the US, Australia and Canada.

The body said it was clear that the **v)** ..... ai-generated jobs substitution remains significant, **vi)** ..... of decreasing wages and job losses". However, it added that **vii)** ..... AI was changing jobs rather than replacing them.

"Occupations in finance, medicine and **viii)** ....., which often require many years of education, and whose **ix)** ..... rely on accumulated experience to reach decisions, may suddenly find themselves at risk of automation from AI," said the OECD.

WRITE YOUR OWN ACADEMIC COLLOCATIONS IN CONTEXT

1. Below are sets of academic collocations related to different topics. Choose the most appropriate word in each pair and write one grammatically correct, academically appropriate sentence for each. **Your sentences should reflect the topic indicated:**

CLIMATE CHANGE

a) **Example:** *(long-term/long-run + perspective): Understanding the causes and consequences of wildfires requires a long-term perspective.*

ARCHITECTURE

b) (*prominent / outspoken* + feature):

……..……..……..……..…….....

……

SCIENCE

c) (*complex / compound* + process):

……

……

HEALTH

d) (*forceful / compelling* + evidence):

……...……..……..……..

……..……..

ENVIRONMENT

e) (*detrimental / pessimistic* + impact):

……...……..……..……..

……..……..

CHINA

f) (*prime / fundamental* + principle):

……..……..……..

……
